Five-Digit User Code Needed From Adient User :

Example : Five Digit address code
Available in Adient user profile

- When sending data to Adient you will need to know the users unique five-digit user code to locate them in the system
- If you previously sent data to Adient using the legacy Rocket True Fusion (TFE/DDX) account, then you can continue to use the same user code for the respective Adient user.
- If you are trying to send data and do not know the user code, you will need to request it from the Adient Contact

The screenshot displays the ADIANT user interface. At the top left is the ADIANT logo. A navigation pane on the left contains 'Sent' and 'Inbox' icons, with '1' next to the 'Inbox' icon. The main header area includes a '3' next to a home icon, a '4' next to a user profile icon labeled 'PP', and a '5' next to a refresh icon. Below the header, there is a 'Create New' button (labeled '2') and a dropdown menu for 'My Company Send Job List'. A search bar is also present. The main content area features a table with columns: 'Actions', 'JobID', 'Name', 'Created On', 'Receiver', 'Receiver Company', and 'Adient Program'. The table contains one row with data: JobID 'Job0000010', Name 'Ext User Test', Created On '30-Dec-2020 07:26', Receiver 'Pravin Mahalle', Receiver Company 'Adiant', and Adient Program '2'. Below the table is a pagination control with 'Previous', '1', and 'Next' buttons, with '7' next to the table and '6' next to the pagination control.

1. Navigation pane:

Inbox / Sent - List of all the incoming or outgoing & draft jobs

2. Create New:

To prepare new exchange

3. Home:

To navigate back to the Home Page

4. User Profile:

Details and settings of signed in user

5. Refresh Icon:

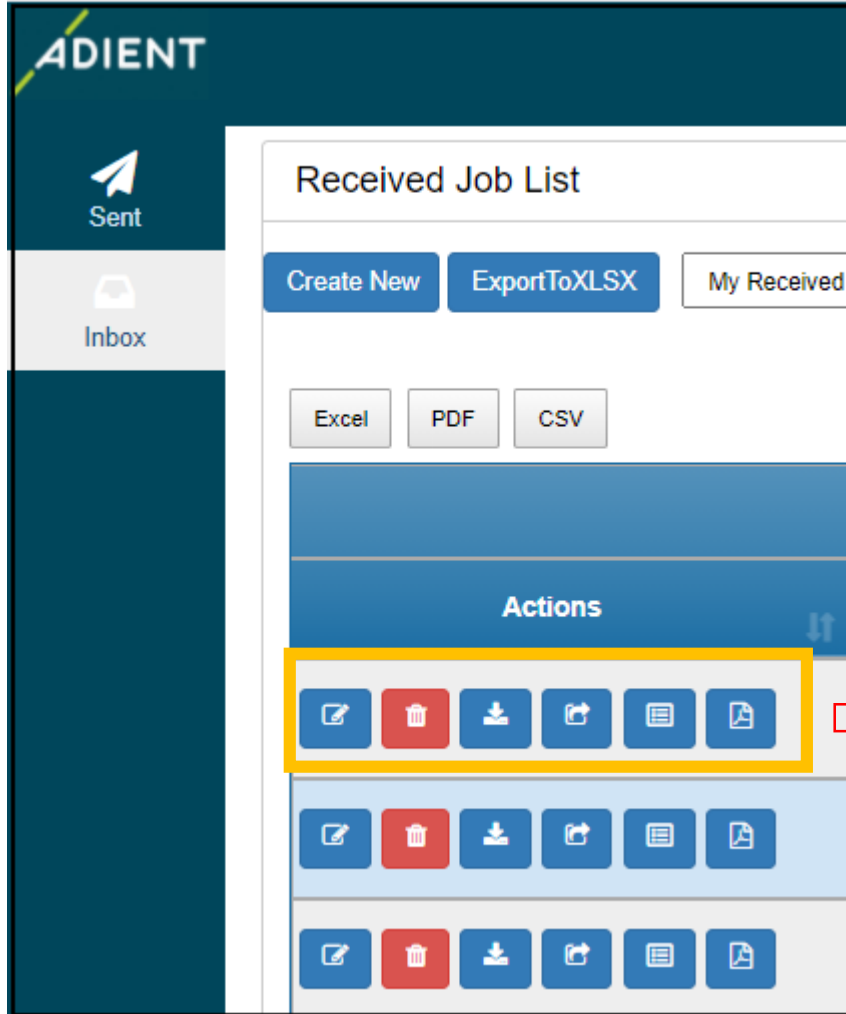

To refresh your job list

6. Page List:

To navigate job list when longer than a page

7. Job Details:

Provides each job details and status

Actions:

This includes following possibilities for respective jobs:

-  ***Edit Job***
-  ***Delete Job***
-  ***Download Job***
-  ***Forward Job***
-  ***Events***
-  ***PDF Export***

Description Daimler Data

Adient Program Daimler Complete Seat

OEM Program Daimler

Program Manager Adient PM

User has two options to upload data:

- 1 - File (single file or multiple individual files)
- 2 - Folder (complete folder with all files in it)

File Selection Method:

The screenshot illustrates the file selection process in the 'Data Exchange Test' application. It is divided into two panels. The left panel shows the initial state where the 'File' option is selected in the 'Data*' section (Step 1). An 'Open' dialog box is displayed, showing a list of files in the 'Catia_data' folder (Step 2). The file 'C3505334_AC_60 BACK STRUCTURE MANUAL_BACKFRAME.CATPart' is selected, and the 'Open' button is highlighted (Step 3). The right panel shows the final state where the selected files are listed in the 'Data*' section (Step 4). The 'Source' column shows a folder icon. The 'Receiver/Company' field is set to 'Mária Sovík-Maková'. The 'Description' field is 'Daimler Data', 'Adient Program' is 'Daimler Complete Seat', 'OEM Program' is 'Daimler', and 'Program Manager' is 'Adient PM'.

Receiver/Company*	Mária Sovík-Maková
Data*	Source
3 files.CATPart	
3488183_AA_PCW - Bent.CATPart 3503846_AA_PCW - Bent.CATPart C3505334_AC_60 BACK STRUCTURE MANUAL_BACKFRAME.CATPart	
Description	Daimler Data
Adient Program	Daimler Complete Seat
OEM Program	Daimler
Program Manager	Adient PM

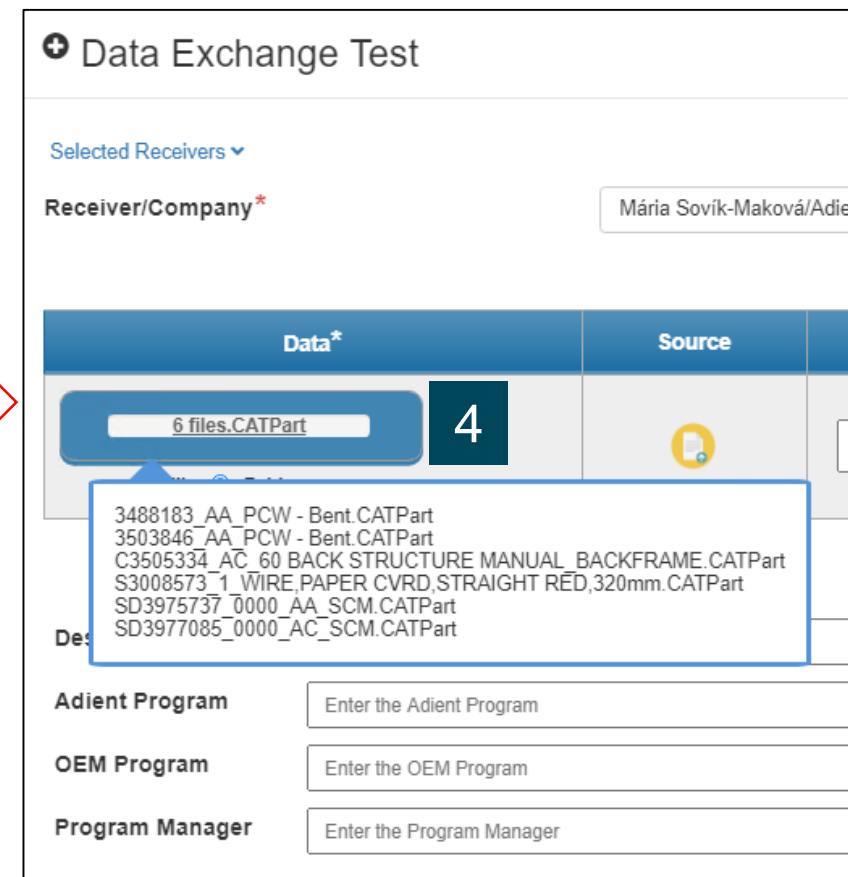

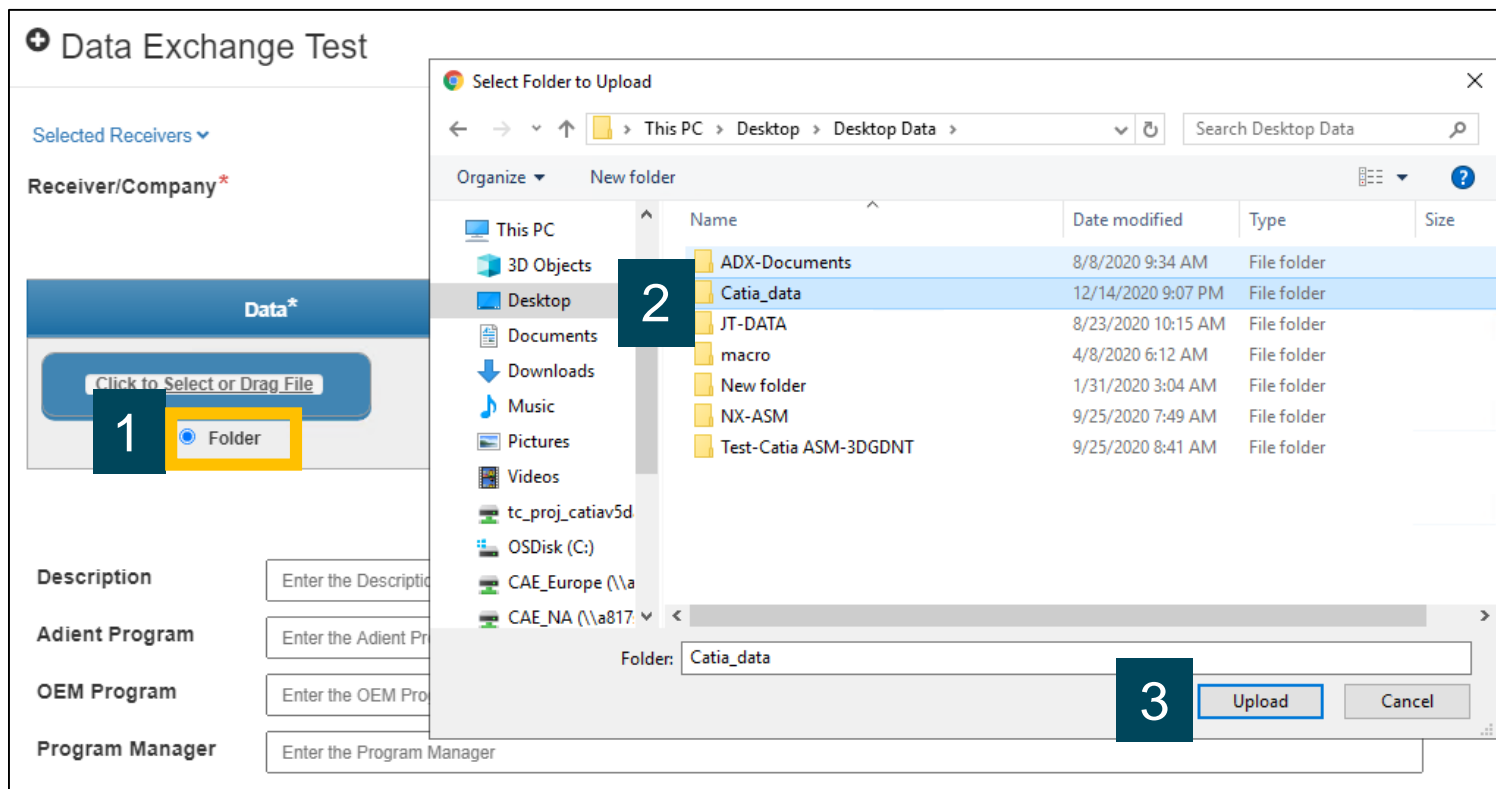

1 - Select "File Option"

2 - Select data (Single or CTRL + Right Click for multiple selections)

3 - Select open

4 - Hover over the blue data section to see the list of selected files

Folder Selection Method:

- 1 - Select "Folder option"
- 2 - Select any Folder to upload (all files within the folder are selected automatically)
- 3 - Select upload
- 4 - Hover over the blue data section to see the list of selected files

Check Job Status: Sent/Received/Saved Jobs

- After submitting a job, user can view sent Jobs inside the “**Sent**” list
- User can view all received jobs inside “**Inbox**” list
- All the saved jobs/drafts can be shown inside the “**Inbox**” with its status (see status list below)

Actions	JobID	Name	Initiator	Initiator Company	Receiver	Channel	Packaging Format	Created On	Status
     	Job0000164		Pravin Mahalle	Adient PLY	Pravin Mahalle	HTTPS	zip	27-Jan-2021 17:13	Submitted

✓ **Additional Options**

- ❖ *Example: How to send CATProduct (Assembly Data) with Translation/Exchange – CATIA to JT*

Additional Options: Pause/Resume Data Upload

- User can Pause & Resume data uploads.
- This is useful if the network connection is disrupted.
- Note: The browser window for the transaction must remain open during the disruption for the resume feature to work.

Additional Options: Job List Filters

➤ Various **Filter Options** are available if the job list gets long. Example below shows how to filter by **Job ID**.

Actions	JobID	Name	Created On	Receiver	Receiver Company	Adient Program	Initiator	Initiator Company
	Job0000641	test- step to catia	10-Nov-2020 19:20	User A	Internal Company 2		User B	Internal Company 2
